

## What is it about?

The 1+2 Factor is a national competition open to all Scottish education establishments.

We want to showcase the learning and teaching of languages in Scottish schools and encourage the use of digital technology to support the implementation of the 1 + 2 languages policy.

Schools will have the chance present their work at the final showcase in Glasgow on Wednesday 30th September.

## Why get involved?

- Today's children are growing up in a multilingual world and the ability to communicate effectively is crucial if they are to play their full part as global citizens.
- The 1 + 2 approach is aimed at ensuring that every child has the opportunity to learn a modern language from P1 onwards and taking part in the 1 + 2 Factor can help you achieve this in your schools.
- We are inviting individual classes, schools or clusters to use any of the tools within Glow to create a learning space which will help in the implementation of 1+2.
- Entering the 1 + 2 factor will allow you to become part of a **community of teachers** across Scotland all working together to achieve the same goal.
- You will be able to use Glow tools to create, collaborate and innovate with other practitioners across the country.
- You will have the opportunity to share your ideas about making language learning a fun and interesting experience for teachers and pupils alike.
- By taking part in the competition you will be contributing to providing a rich bank of resources, ideas and links which will then be available for future use.
- We can link you to external enterprises and cultural organisations, who can provide you with opportunities to create real-life learning experiences
- Finalists will get to attend a great day out where they will present their work in the morning then in the afternoon they will get to wander round the marketplace and take part in activities involving languages and technology.
- It's an ideal opportunity to not only develop the language provision in your school but also to improve your school's use of digital technology in languages and any other curriculum areas.
