

Student feedback on STEM activity

An apprenticeship with Jaguar Land Rover

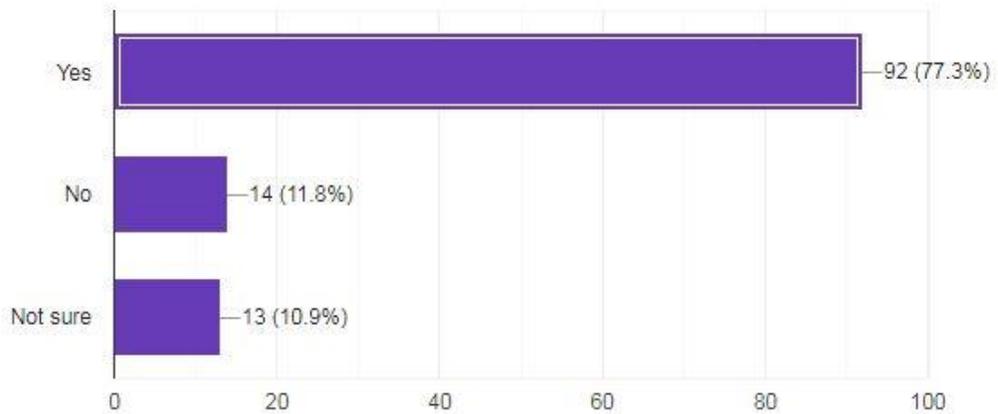

17 December 2018

Mick Burns, Careers Adviser

130 S3 students attended a presentation from a former student, James and his colleague Emily, both year one apprentices on the Powertrain Programme with JLR. We used the opportunity to provide a question and answer session, highlight relevant careers related websites, produce a podcast and gather feedback in preparation for Senior Phase Option Choice, next term.

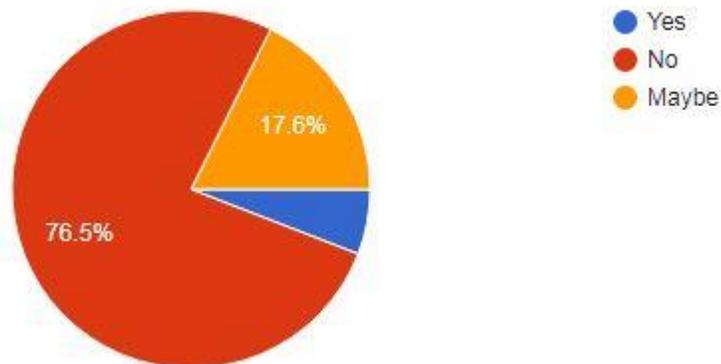

Were you considering taking Science subjects before this talk?

119 responses

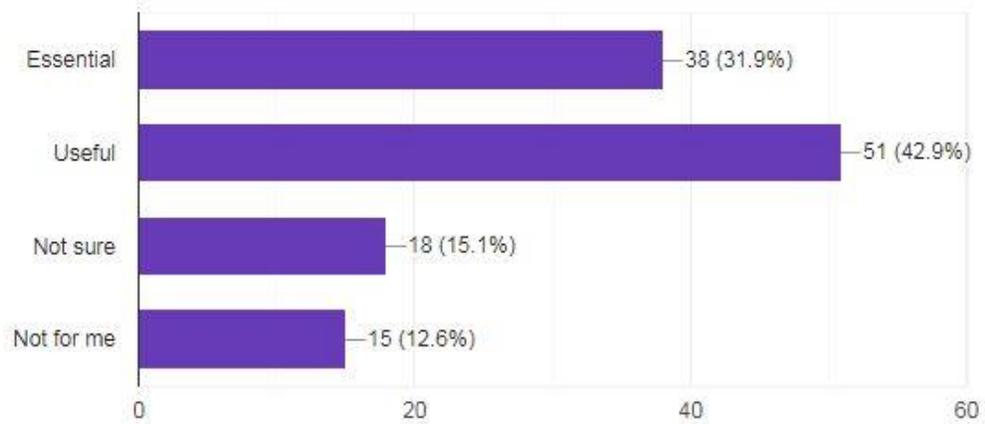

Have you changed your mind about taking Sciences after this talk?

119 responses

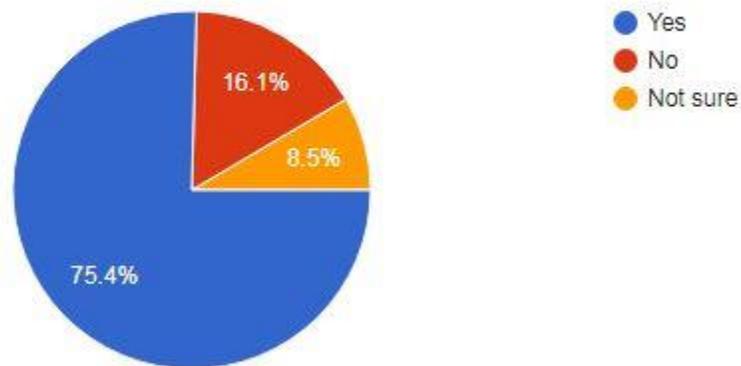

How important do you think Science subjects will be in your future careers?

119 responses

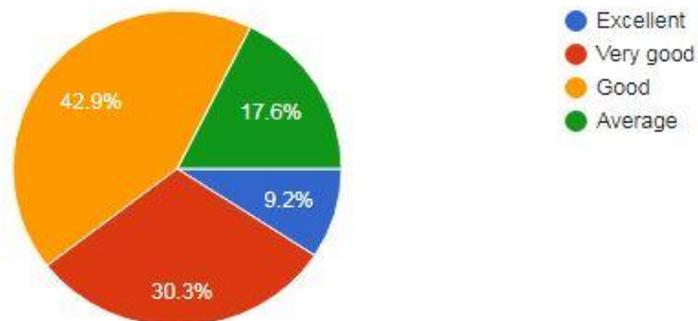

Did you learn more about engineering careers today?

118 responses

Did you find this presentation

119 responses

What have you learned about STEM subjects today?

That they are a very good alternative

The range of uses that they have in different professions.

How important that can be in even paying your college funds

You get paid.

You don't have to do uni?

They are important

STEM subjects mean science

You get a fair bit of money

They are very important

They are important for certain jobs

Apprenticeships are useful

The Application process is 'intense'

The options it can give you

I have learnt about apprenticeship

They have some of the highest paying jobs

There are lots of possibilities

The degree is the same as any other university degree

You get a lot of money

What you can do with them

That they're good for certain apprenticeships and jobs

That you get paid a lot more than in other jobs

Highly competitive, lots of different types of jobs within STEM

STEM subjects will be very useful in the future

What STEM is

what you can do with them

they can get you good careers

That they are very useful for many careers

What stem is

You can get apprenticeship

That it can pay extremely well out of university, and that there are a massive amount of jobs in the STEM section.

That you get a lot of money

They are useful in lots of different jobs

STEM subjects pay the most

You can do apprenticeships

You get a lot of money

The salary that you get when you're doing a stem subject job is a lot higher than most other jobs.

its a secure way to get a decent job

I've learned what stem stands for with the subjects

you need it maybe

That it includes maths

They have a higher pay than other jobs but are a lot more intense than other jobs

That you can get any job if you try and get it

I have learned that there are many careers and opportunities which can opened up if you take STEM subjects

That if you take an apprenticeship with JLR you'll go to Warwick Uni

They're important

They can be useful for getting jobs that earn you a lot of money
They are a good pathway, and apprenticeships are good options.
That they are important
That the STEM subjects cover a wide range of jobs and opportunities. I was unaware that it covered companies such as Jaguar Land Rover
Good salary
apprenticeships
What STEM stands for
What STEM actually means
they are important
That they cover a lot of topics
If I keep my options open then there are a lot of different apprenticeships available
That they are well paid and are a good job opportunity
How Apprenticeships work
That you can get a really good job and good pay and good experiences
That they get you jobs with a high salary
it's an increasingly popular business
You earn money while taking the degree
They are very grueling and specialist
It's becoming a more popular business
That STEM subjects are useful in many different jobs.
They are more complex than I thought
that you don't need to go to uni
that jobs that involve them get lots of money
I have learned that they have an impact in your future.
There are loads of different paths for science
it's good if you want to do engineering
That they are very important
That you don't have to go to University to make a good earning.
It can help you
How significant they are and the outcome of the work put in
It helps with some jobs with cars
That they are good
that it is useful for when you leave school
I've learned what stem stands for with the subjects
There's actually quite a few stem jobs
that it gives a lot of opportunities
it helps you earn money in future
About what happens in a regular day if you have a STEM apprenticeship
They have a higher pay than other jobs but are a lot more intense than other jobs
That the STEM subjects cover a wide range of jobs and opportunities. I was unaware that it covered companies such as Jaguar Land Rover
They have a higher pay than other jobs but are a lot more intense than other jobs
That they are helpful
More complicated
there are plenty of good jobs/apprenticeships for Stem students

Write a positive statement to help promote STEM subjects!

It is very important

They are helpful, make sure you take it seriously

You get paid

Stem is good

They are cool

STEM IS GREAT !!

They help you get a job

They are a good alternative to university's

STEM subjects give you great life skills that many employers look for when hiring so it's useful

Join us to get paid the most

STEM IS GOOD

You get paid a lot :)

It's great

Stem is cool

Stem is very useful! Especially if you want to go into Engineering, or Computing, etc. :)

You will get paid lots

STEM is the future

STEM subjects are fun and interesting

U can do it

STEM is love STEM is life ☐☐

STEM is fun

stem subjects are useful:)

they can enable you to get good qualifications that are sometimes fully paid for

I ☐ STEM

Stem is ace

It's good

Keep trying!

Stem is super duper

Stem rocks

Higher average salaries

It'll be useful in the future for many subjects

You don't have to pay tuition

Stem subjects will set you up for a fun and interesting future

the engineering field is filled with great exciting jobs

You can make it far with stem

Employers like STEM subjects on cvs

yay! go stem projects!

STEM is very useful because it helps you learn more about your job and why it is as it is

stem subject are very interesting

STEM is good

You get loads of cash money.

They're extremely important

they give you more options

It's helpful

They will help us out lots in the future and they are fun :)

Stem subjects are very useful :)

They help in future careers

STEM subject are fun and can give you a new way to look at the world around you.

you earn lots of money

STEM subjects are very fun

It's useful

They help you in many job paths

It's the future!

They help you with many different subjects

S-snazzy

T- terrific

E- exciting

M- magnificent

They are important for the future and generally for high paying careers

Stem subjects are really good and helps you learn more about the stuff around you

They are very helpful

Secure job

Time Consuming

Enthusiastic

Money

they are important for the future and are generally high-paying careers

Stem subjects will help you where you want to be in the future!

STEM subjects help you in so many jobs.

they are useful for future careers

stem gives opportunities

GO STEM!

They will help us out lots in the future and they are fun :)

STEM is very useful because it helps you learn more about your job and why it is as it is

They cover a broad range of jobs and opportunities for different ages and interests.

STEM is very useful because it helps you learn more about your job and why it is as it is
Its good

It's important to do what you enjoy for the future, but it's also important to choose something that will help you sustain a happy life. STEM subjects are the best way to have both of these things.

STEM is good

They are good

they are good for later on in life

You can make it far with stem

There's some exceptional Stem jobs

stem = opportunities
