

Apprentice Finishing Carpenter & Conversion Fitter

Jerba Campervans is an employee owned business, so everybody in the workforce has a vested interest in its growth and success.

Based in North Berwick we manufacture brand new VW campervans and with annual sales of nearly £3m we have customers from across the UK. We specialise in high quality and have a market leading reputation for both finish and customer service. We build all our campervan furniture from scratch - starting from a 1220mm x 2440mm laminate board everything must be cut, scribed, trimmed, edged and assembled to perfection.

This new position of Apprentice Finishing Carpenter & Conversion Fitter is a vital new role within our growing business. Working alongside fully qualified and experienced finishing carpenters, the role provides an excellent opportunity for someone just beginning a career in carpentry. Attending the Wood Machining Level 3 SVQ course at Forth Valley College, Falkirk (one day per week during college terms) over 4 years will see the successful candidate becoming fully accredited through a recognised Scottish Govt apprentice programme.

We expect all employees to be passionate and committed, to ask questions and be innovative, to build solid relationships with other employees and to roll up their sleeves and help each other out whenever it is needed.

No previous work experience in carpentry is required, however, a proven interest in and enthusiasm for hands on tasks where precision and quality can be demonstrated is vital.

Salary range £7.00 to £9.00 per hour depending upon experience. Annual employee ownership bonus (after 12 months employment) and 30 days annual holiday allowance including statutory days.

Applications made in writing to;

Alan Winter
Operations Manager
