

MacTaggart & Scott

Our History

As a well-established and forward-thinking organisation, innovation, flexibility and responsiveness are our major strengths. We are proud of our history and tradition, but believe that sustainable competitive advantage can only be achieved through continuous improvement, investment and a commitment to business excellence at every level within the company.

What We Do

MacTaggart Scott primarily supports the Naval Defence industry, providing complete solutions to customer needs from analysis of initial customer requirements, to design and manufacture, and right through to commissioning and through life support.

The company employs 350 people and has a turnover of £40 million.

MacTaggart Scott has subsidiary companies in Australia and the USA.

Sister company, MacScott Bond was formed to serve the commercial fluid power market.

APPRENTICESHIPS

Turn An Engineering Interest Into Valuable Skills, Experience & Qualifications

Join MacTaggart Scott as an apprentice, and you'll occupy a key place within our business. Quite simply, you are part of our future. That is because with your talents and your skill we will keep growing, keep innovating and keep competing with the very best in the world.

Becoming an apprentice takes an enormous amount of commitment, hard work and dedication. At MacTaggart Scott, apprenticeships are considered the foundation of a career, providing the essential skills needed for your future with us.

At MacTaggart Scott we are proud of our Apprenticeship Programme and the skilled people it produces. It is an integral part of our operations and we rely on first class trades people to produce first class jobs. In order to produce first class trades people, we need first class apprentices and we are looking for people that are genuinely interested in and enthusiastic about developing a career in your chosen area.

Our apprenticeship programme will see you turn your interest in engineering into valuable skills, experience and qualifications.

Apprentice Production Engineer (APPLICATION PROCESS NOW OPEN Until April 9th 2021): We are hiring 10 apprentices this year

If you want a practical hands-on career which guarantees further technical training and experience, then apply for an apprentice position with us and train to be an engineering craftsperson.

We have a variety of apprenticeships available this year:

Production Electrical
Machinist
Fitter/Test Fitter
Painter
