SCOTTISH SPACE SCHOOL@STRATHCLYDE 2016

Next year's residential summer school will be held at the University of Strathclyde from 12-17 June 2016, and pupils can now apply online via the Space School website.

The Scottish Space School seeks to inspire the next generation of scientists and engineers and it is aimed at S5 pupils currently studying maths and science subjects at Higher level.

I would greatly appreciate it if you would bring Space School 2016 to the attention of pupils in this year group at your school and actively encourage them to apply. The website can be accessed at:

www.scottishspaceschool.org.uk

Thanking you for your co-operation.
