

# Design a Shoebox Garden

## You will need:

- Shoebox (or just the lid of a shoebox)
- Tinfoil or blue paper (for water features)
- Different coloured felt and card
- Natural materials, such as leaves, moss and twigs (optional)
- Scissors
- Glue
- Pencil

## What to do:

1. Use a pencil to draw the outline of what each area will be. Try to think about which colours would look nice next to each other. You might want to include paths for the gardener to walk down.
2. Cut out the different materials and stick them down in the right areas.

## Ways to extend the activity:

- Create a key to explain more about each part of the garden.
- Put the garden design on a computer program.

## National Curriculum Link

To use a range of materials creatively to design and make products.
