

## Times tables Search

### Instructions

Decide who will be player one and player 2.

Player 1 goes first.

Player 1 need to find two numbers next to each other that make a sum in the three times tables e.g.

15
5

Or

$$5 \times 3 = 15$$

2	6
---	---

Draw around both the numbers, just like you would in a word search.

Then draw a line under player one to keep a tally of how many you number pairs you have found.

Now it's time for player two, to search the board.

Keep going until one player can't find any more number pairs.
