

Choose life. Choose a job. Choose a career. Choose all this from studying the most important science of the 21st Century. Choose Web Design, Animation and Graphics Manipulation. Choose Artificial Intelligence, Robotics and Networking. Choose knowing how modern technology works and wonder how you survived for so long without knowing it. Choose building your own computer and feeling the real power of understanding the technology. Choose knowing that without that understanding you would be unable to cope with the massive technology changes that will take place in your lifetime. Choose Wifi, Bluetooth and Broadband. Choose writing your own computer programs. Choose being attractive to employers. Choose a starting salary far higher than most other graduates. Choose the only subject that is important in the modern world.
