

Accessing Your Google Account At Home

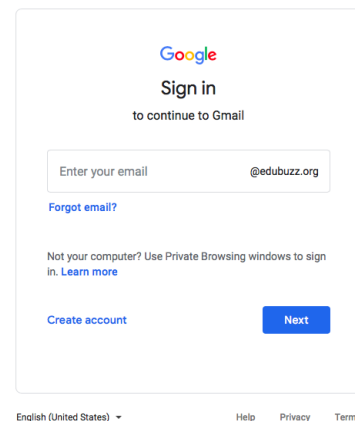

The G-suite is an online platform that we use in school regularly and is used to share and support learning at home. The Google Classroom feature is how we will share remote learning with you and your child during this time.

Please use the instructions below to help you access the G-Suite from home.

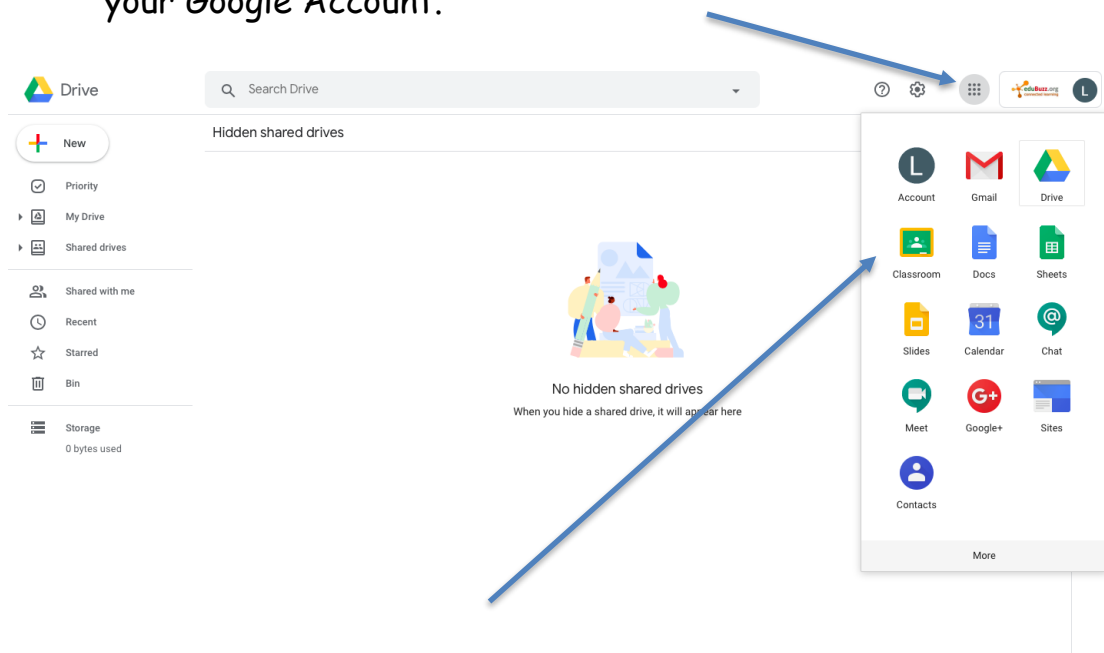

1. Using Google Chrome (not Internet Explorer) open the Google website and click 'sign in' at the top right hand corner of the page.

2. Enter your edubuzz email address and password to access your G-suite account. Every child received their Google log on details at the start of the year.

3. Use the 'waffle' or 3x3 dot grid to access different parts of your Google Account.

4. Click on the Google Classroom image to access your child's online classroom.
