

Chemistry Residential

Thursday 12- Saturday 14 September 2013
Friday 13 - Saturday 14 December 2013

A 2 part residential course for Secondary Teachers of Chemistry

Building on the success of previous events, this course will focus on practical work to support Curriculum for Excellence up to National 4&5. Areas to be covered will include Ceramics, Metals and Products from Plants. The course will focus firmly on experimental practical work. A detailed programme is available at www.sserc.org.uk

Practical work will be supported by discussion activities and talks from visiting speakers. Combined with opportunities for professional networking, the course offers participants a rich and vibrant programme that will enhance teaching and learning within their institutions.

The course will be held at SSERC, Dunfermline with overnight accommodation provided at the nearby King Malcolm Hotel. All meals are included throughout the course.

Only 20 places are available, so early application is advised.

The course fee is £100. Funding from the Scottish Government allows us to provide each delegate with equipment and teaching resources with a value of some £200 to help the implementation of activities in your school.
